

Boiler Training Webinar!

One week course delivered via WebEx in two hour sessions over the five days!

Web Delivered Boiler Training

Who should attend:

This seminar is designed for Boiler Operators, Maintenance Personnel and front line Supervisory Personnel.

Objective:

The overall objective of the seminar is to increase the baseline knowledge of recipients on how a boiler and it's support equipment operate. Additionally, the program stresses safety and the proper operating practices required to maximize efficient, safe and reliable service of the equipment.

Agenda:

- Thermodynamics & heat transfer; Understanding what is really going on inside the unit.
- Overview of the most common boiler designs and their unique differences.
- Why some boiler designs operate better in certain situations than others.
- Burners & combustion, the theory and the application.
- Total system efficiency; where the losses can occur.
- Steam system load demand; impact on the vessel and steam quality plus steam purity.
- Boiler operating controls, their function and relationship with the flame safeguard.
- Boiler accidents can be avoided...The why and how...
- How the flame safeguard interfaces with the logic within the burner control system.
- Sequence of operation including insights into troubleshooting.
- Boiler feed pumps emphasizing pump curves and cavitations.
- Proper maintenance recommendations.

IT ALL LEADS TO SAFETY, RELIABILITY & EFFICIENCY!
